 Culver Works
9415 Culver Boulevard · Culver City

Details

This is a free workshop for anyone (18+) who would like to learn data science using Python. We will be coding as a group, with examples and exercises led by the instructor. You'll learn the basics of data science using Python programming, and you'll leave with the ability to learn more advanced topics and specific toolkits.

Please bring your laptop to code along! No prior programming experience necessary - we'll teach you from scratch. We recommend creating an account on <https://cocalc.com/> to code along in Jupyter notebook.

We like to keep these sessions small to make sure everyone is able to ask questions and get help, so please RSVP on Meetup to reserve your spot:

This workshop is presented by theDevMasters:

<http://www.thedevmasters.com>

theDevMasters, owned by Einstein Assembly, provides educational applied labs and training for data scientists, data engineers, enterprise and other professionals. Our goal is to cover the gap between academic learning and demand in the market. Whether you are looking for educational enhancement, a salary boost, or a career change, we can help you achieve your goal in the shortest amount of time.

theDevMasters, an Artificial Intelligence company

Irvine : 8 Whatney, Suite 124 | (949) 478 2836

Santa Monica : 1450 2nd St | (949) 751 6156

The best decisions are made with data.
